# ELEGANT LOOK

Designer Nitin Thakur's latest residential design exemplifies a modernity with beauty and utility. As a designer, he believes that there is no meaning in life without challenge and loves to take it and overcome the same.

Designer, Nitin's founded Imagine Interiors in 2005 and his forte lies in maximizing utility and economic returns for all the clients by possessing and providing specialized skills and completing the project within the set time frame.

Entering the residence of Ritesh Mundra, one will see the mind-blowing interiors designed using the basic items like Smoke Veneers, Corian, Italian Marble, Mother of pearl; Metallic Tiles. Decorative Lights were extensively used to bring in life to the space. The Buddha Mural with Rudraksh work and eye soothing light effects placed in the living room adds to a life in the place. Elaborating on the furniture design, he says, "Seeing the trend, we have adopted modern design and have used LED lighting to create different moods within the spaces, beautifying the same and maximising the utility of the space. The colours scheme used is Walnut.

### The plan

The house is designed into a G+1 floor. The living room is designed in an exotic

manner and connects with the dining area. The wooden door and the Buddha mural will lure you and is the central piece of attraction. From here once will see an open kitchen, specially designed as per the client's need. The house has four bedrooms, with a modern look and king sized beds. Speaking about the bedrooms, the designer shaped the kids bedroom with love and understanding the child psychology. The client has two kids, one son and a daughter, so the kids' room is designed in blue. Blue lights, furniture and bed in blue colour completely blend in and create a cuddly kids zone.

Indeed a modern design completed in the span of just 9 months. 📍
